

Boost the power of Microsoft Business Central 365

Microsoft Dynamics 365
Business Central

Overview

The Professional Advantage suite of solutions for Microsoft Dynamics 365 Business Central brings additional levels of internal control and good governance to your organisation through implementing and automating best practices in key business process functions. Our solution set gives you a rapid ROI through the introduction of smart end-user functionality, high performance and levels of integration not available in other solutions.

Our suite encompasses improvement for the Office of Finance some of the core functions, as well as addressing other areas of the business:

- Payments & remittances
- Credit control
- Spend control
- Data integration
- Staffing for the Recruitment sector

Professional Advantage (PA) has a long history of working with Microsoft both as an implementation partner but also as a global developer (ISV). For many years, Microsoft included Collections Management, our credit control solution, within the core software. With the advent of Business Central and Cloud, PA have taken back responsibility for our IP and have further enhanced our suite with a number of additional solutions that enhance, not replace, the functionality that you have on offer from Microsoft 365.

More About

1Staff 365

Cloud-based, end-to-end staffing software solution.

1Staff Front Office powered by Microsoft Dynamics 365 Customer Engagement, enables you to combine your CRM, ATS and Onboarding systems within Microsoft Cloud. Empowering your team to deliver results, providing your customers with a great experience, and investing in tools to manage your Marketing, Recruitment, Analytics and Operations.

The Back Office is built on two platforms, you can choose to implement 1Staff 365 built on Microsoft Dynamics 365 Business Central or 1Staff Back Office powered by Microsoft Dynamics GP. Both powerful pay/bill and full financials (GL/ AP/AR). 1Staff will help your workforce capture their time, help finance smooth the pay/bill process and help the executive control and grow the business.

1Staff Analytics & Planning underpinned by Microsoft Power BI delivers extensive analytics, role-based dashboards plus budgeting forecasting and scenario planning.

Ideal for: recruitment organisations wanting to have an end to end, streamlined solution encompassing billing, marketing, operations etc.

B4B 365

Simple, secure payments automation.

B4B is the interface between your payables solution and your bank(s), streamlining and standardising payment processing across your entire organisation. Automatically email the payment remittances to your suppliers from Microsoft 365.

B4B not only caters for local currency payments but also the complexities of our ever changing global market.

It increases efficiency, mitigates risk, improves control giving you full visibility over your entire bank payment process.

Ideal for: companies who have multiple global entities and/or pay out of a central office on behalf of other offices around the world.

Collect 365

Powerful, flexible Debtor Management.

Collect 365 for Microsoft Dynamics Business Central 365 streamlines and automates your collection processes in a professional and auditable way.

It provides companies with unparalleled credit management and debt collection functionality. Thorough analysis of debtor days and cash flow, close monitoring of debtors and the ability to track collections are key benefits quickly delivered by Collect. All this means that you can reduce Days Sales Outstanding and improve cash flow, while minimising collection costs.

Ideal for: organisations with a credit control team looking to improve their cash flow.

iPOS 365

Powerful end to end Spend Control.

A web-based, end to end, browser delivered procure to pay solution. iPOS drives down maverick purchasing, controls spend across the organisation, manages extensive approval delegates and workflow requirements and delivers comprehensive transparency and auditability to the organisation.

The dashboard delivers spend visibility to all stakeholders in the purchase lifecycle in a simple and friendly UI.

Brings data truth and accuracy as well as real time reporting.

Ideal for: organisations looking to either move off manual purchasing or improve their current spend control processes.

PA Streams

Intelligent integration.

PA Streams makes the complex, simple, to resolve multi-source data integration issues. Integrate data to provide real time analytics and situationally aware process management automation to transform your business.

PA Streams extracts, transforms and uploads to a destination system quickly and easily.

Ideal for: organisations looking to link multiple data sources together with full visibility and event management.

Ideal for: organisations looking to link multiple data sources together with full visibility and event management.

PA eSign

Fast, secure electronic signatures.

Signing documents through an electronic service brings compliance, speed, transparency and confidence to the process from end to end.

PA eSign can quickly and safely process single ad-hoc documents and more complex multi-party documents at a cost-effective price

We help turn your vision into reality

For 30 years Professional Advantage has been meeting the evolving technology needs of our clients in Australia and internationally. Our focus on business outcomes for our clients, and wealth of knowledge across a wide range of industries and solutions has ensured we have remained an integral partner and trusted adviser for over a thousand organisations.

We are one of the few Microsoft partners that are in the unique position as both a partner but also a development ISV, to not only fulfil your cloud and application licensing needs, but also support you in your IT journey with software implementation, user adoption, helpdesk, and security services.
