12:30 -13:30	Dive Bar, Events Lobby & Windmill Room	Lunch

13:30 – 14:45	Auditorium Andrew Parsons	Take control of Procurement: iPOS 21 Purchase to Pay & Intelligent Invoice Capture Spend control is important, regardless of the size of your company, because it provides a level of transparency and control over spend that can be used to reduce risk, drive growth, increase profits, and introduce operational efficiencies across the board. Automating your invoice capture provides an efficient alternative to manual processing by providing benefits that not only help to significantly reduce costs, but also boost the productivity of your AP department. A look at the most widely used Spend Control solution within the SunSystems global market. The incomparable uniqueness of iPOS is our seamless, native integration to Infor SunSystems. iPOS is not reliant on a duplicated supplier database nor a third-party purchase ledger. The session will also include the benefits of having fully automated, integrated spend control and invoice capture.
14:45 – 15:15	Dive Bar, Events Lobby & Windmill Room	Coffee
