

Enhance the Power of Infor SunSystems

Cloud Solutions Availability

About us

We are committed to delivering unparalleled software solutions that have been exclusively designed for Infor SunSystems.

At the core of this commitment is not only our close development partnership with Infor, and our relationship with our clients. The long-standing partnership with Infor globally is the cornerstone of our promise to deliver software solutions that not only addresses your current needs but anticipates and adapts to your future challenges, providing you with truly exceptional and solutions for success.

We understand that the success of any software project hinges on effective collaboration, communication, and a thorough understanding of your unique needs. Through our collaborative approach, we ensure that your vision is not only heard but becomes the focal point of our development process.

What our portfolio will give you is trust in your data, trust in your decisions and trust in your insights. This is what makes the Professional Advantage Infor SunSystems suite completely different.

Solutions Overview

The Professional Advantage Infor SunSystems suite brings additional levels of internal control and good governance to your organisation through implementing and automating best practices in key business process functions.

The suite gives you a rapid ROI through the introduction of smart end-user functionality, high performance and levels of integration not available in other solutions. It encompasses the Office of Finance core functions:

- Payments & remittances
- VAT Returns (UK companies)
- Integration & Data Automation
- Bank statement reconciliation
- Credit control
- Invoicing Spend control
- Consolidation of data

“We strive to make a great product like SunSystems even greater.”
