Collect 365
for Microsoft Dynamics 365 Business Central

Are you spending too much time collecting your outstanding debts?

How much cash are your overdue receivables draining from working capital? Are customers taking unfair advantage of your credit terms?

Collect 365 for Microsoft Dynamics 365 Business Central streamlines and automates your debt collection processes in a professional and auditable way.

Features and benefits of using this extension:

Collect 365 centralizes your debtors position, helping you drive your collection tasks in an effective and visible way. You can:

See overall and individual customer debt positions at a glance.	Record and track the collection activities to date.	Generate bulk reminder emails and letters linked to tasks.	Embed offending transaction details in your communications.	Create and schedule collection tasks for specific transactions.
