

REASONS TO MOVE TO PA CLOUD FOR HOSPITALITY

PA Cloud is hosted on Microsoft Azure enabling you to reduce costs and complexity in a highly secure cloud. Solutions are available for both Infor SunSystems Single Tenant and Multi Tenant.

With nearly 35 years of developing solutions for Infor SunSystems, our solutions will give you trust. Trust in your data, trust in your decisions, trust in your insights. This is what makes our solutions completely different.

Together with Infor and Professional Accounting Solutions Inc. (PAS), we can provide a complete Cloud solution for all hotels, whatever your size.

Moving to Infor SunSystems Cloud, in conjunction with the Professional Advantage solutions and the deployment expertise of PAS will give you these benefits, and many more:

70,000+

Users globally benefit from using our solutions.

33 years +

developing solutions exclusively for Infor SunSystems.

**Combined
Expertise**

Our decades of deep understanding of Infor SunSystems combined with the expertise of a team who have all worked in Hospitality and understand your business.

**Support
wherever you are**

9 Help Desks globally with the additional expertise of the Product Author in EMEA and Oceania.

Security

PA Cloud is built on Microsoft Azure with all the advantages of Microsoft security. Microsoft's cloud platform is built with security as top priority, complying with the world's most rigid governance and compliance regulations.

4 x ROI

vs on premise

Cloud solutions typically deliver four times the ROI of on-premises solutions and deploy 2.5 times quicker (1).

**Implemented
with Hospitality in
mind**

With its USALI-based core and pre-configured hospitality-centric set of charts of accounts, Infor SunSystems is configured for Hospitality out of the box which our solutions inherently understand.

No limit

Cloud adopters see various benefits from cloud technology, but businesses' top-cited benefits include:

- Automation
- Intelligence/Visibility
- Faster access to infrastructure
- Greater scalability
- Increased availability
